

QUALITY FEATURES

RESILIENT SEATED VALVE Z 011-A

NARROW TOLERANCES

Precision-machined bodies form the basis for perfect seating of the liner and precise positioning of the shaft.

SHAFT RETAINER

The shaft retainer guarantees blow-out resistance of the shaft.

MULTIPLE BEARINGS

The shafts have multiple bearings. Optimal guidance even after many years of use. No contact corrosion.

CONTINUOUS FORMING LOBE

The continuous forming lobe fits perfectly in the relevant groove of the body, stabilising the liner.

POLISHED SEALING SURFACES

The sealing surfaces are mirror polished and guarantee low torque combined with tightness.

DOUBLE-SIDED PROFILES

Double-sided profiles ensure the sleeve-body engagement in the outer body recess.
