

# Knife gate valves SLH and SLX

**Stafsjö**  
SINCE 1666

## Knife gate valves SLH and SLX

Stafsjö's knife gate valves SLH and SLX are designed for the most demanding high pressure applications with slurry and other abrasive media where operation reliability and low life cycle cost are emphasized. The SLH is designed for pressure up to 20 bar/290 psi while the SLX is designed for 50 bar/720 psi.

When these valves are in opened position, the seats form a tight extension of the pipe line and no metal parts are in contact with the media. When the valve closes the seats are displaced axially forming a seal with the gate until it forms a complete closure – 100% tight in any pressure direction.

The SLH and SLX have fully lugged coated valve bodies in nodular iron with integrated purge ports to utilize if the bottom screw plugs are assembled on the valves. The unique seats are available in low friction special EPDM or natural rubber. These seal against a gate in high strength stainless steel specially machined, grinded and coated to reduce the friction when the valve is operated. The gland box system is as standard supplied with three layers of our TwinPack™ and box bottom scrapers in order to give a first-rate sealing and a straight gate guidance.

The top works is modular designed and there are several actuator types and accessories to choose from in our standard collection – all easily exchangeable between each other. For security reason the valve is always supplied ready to be locked in either opened or closed position.

The SLH/SLX valve is designed, manufactured, inspected and tested according to the European Pressure Equipment Directive (PED 97/ 23/EC) category I and II module A1. The valve is CE marked when it is applicable.

Other slurry valves are the lugged SLV available up to DN 900 and the flanged SLF.

### A precise gate guidance extend the service life

A solid top works (1), a robust gland box system (2), internal guiding supports (3) guarantee a precise gate guidance, which is crucial during cycling to minimize the wear on the seats.

### Built in steel reinforcements improve the performance

The front reinforcement rings (4) ensure the seats shape, position and strength remain during operation while the flange sealing reinforcements (5) secure a tight and exact position of the seats towards the gate and connecting flanges.

### Integrated expansion areas give low operating force and minimize the stress on the seats

The seat entrance area (6) is designed to give a smooth gate entry and the expansion areas (7) allows the seat to be axially flexible requiring minimal operating force.

## Design data

Sizes	Flange drilling	Face-to-face dimension	Corrosion protection
DN 80 - DN 450	EN 1092 PN20 EN 1092 PN25 EN 1092 PN40 EN 1092 PN50 ASME/ANSI B16.5 Class 150 ASME/ANSI B16.5 Class 300 AS 2129 Table F/H	Stafsjö manufacturing standard	Non-corrosive resistant materials are coated in colour RAL5015 acc. to Stafsjö's standard, which fulfill the requirements in EN ISO 12944 class C3.

Other sizes, flange drillings, ATEX zones and corrosion protection on request.

Leakage rate	Pressure tests
<b>EN 12266-1:2009 Rate A:</b> no visually detectable leakage is allowed for duration of the test.	Pressure tests are performed with water at 20° C according to EN 12266-1:2009. Pressure shell test: 1,5 times maximum allowable working pressure for open valve. Pressure seat tightness test: 1,1 times maximum allowable differential pressure for closed valve.

Maximum working pressure body at 20°C		Maximum differential pressure at 20°C

## Basic equipment

A. Valve Body			
Material	Code	Type	Maximum temperature °C
<b>Nodular iron</b>	<b>(L)</b>	<b>5.3105 (JS1020)</b>	<b>200</b>

The valve body is as standard supplied with purge ports: DN 80-DN 150: 3/4" - 1/2", DN 200: 3/4", DN 250: 3/4" - 1", DN 300: 1", DN 350 1" - 1 1/4", DN 400 - DN 450: 1 1/4"

B. Gate			
Valve type	Material	Type	Surface treatment
<b>SLH</b>	<b>Duplex stainless steel</b>	<b>EN 1.4462 (S32205)</b>	<b>Hard anti-stick coated</b>
<b>SLX</b>	<b>Stainless steel</b>	<b>EN 1.4542 (S17400/17-4PH)</b>	<b>Hard anti-stick coated</b>

Other materials on request

C. Seats		
Material	Code	Maximum temperature °C
<b>Natural rubber</b>	<b>(NR)</b>	<b>80</b>
<b>EPDM</b>	<b>(E)</b>	<b>120</b>

D. Box packing		
Material	Code	Maximum temperature °C
<b>TwinPack™ with scrapers in UHMWPE</b>	<b>(TY)</b>	<b>80</b>

## Actuators

Manual	Code	Automatic	Code
<b>Hand wheel</b>	<b>(HWR)</b>	<b>Electrical motor</b>	<b>(EM)</b>
<b>Bevel gear</b>	<b>(BG)</b>	<b>Hydraulic cylinder</b>	<b>(MH)</b>
		<b>Double-acting pneumatic cylinder</b>	<b>(EC)</b>

The actuators are described in separate data sheets. For information on the sizing for each valve size or information on other actuators or ATEX-classified ones, please contact Stafsjö or your local representative.

## Specify the Stafsjö valve

Stafsjö's valves are modular designed and they can easily be customized with gate, seat materials and box packings according to media and requirements, as well for actuators and accessories. Below are examples of how you can specify your Stafsjö valve. Further information is available on [www.stafsjo.com](http://www.stafsjo.com).

### SLH-L-200-E-TY-HWR-PN25

<sup>1)</sup> All electronics must be specified in detail.

## Part list

Pos.	Part	Material (Name)
1	Hand wheel	Coated cast iron Ø 200 - Ø 315 (EN-JL1040 (GG25)), ≥ Ø 400 (EN-JL1030 (GG20))
2	Yoke	Coated steel (EN 1.0038)
2a	Bearing	Iglidur XTM
2b	Slide washer	Brass (CW614N)
2c	Bearing	Iglidur XTM
2d	Washer	Stainless steel (EN 1.4305)
2e	Locking nut	Steel, zinc coated
3	Stem with gate clevis	Stainless steel (EN 1.4305) ≥ DN 300: Gate clevis in coated carbon steel (EN 1.0045)
3a	Stop washer	Stainless steel (EN 1.4301)
3b	Screw	Stainless steel (A2)
3c	Washer	Stainless steel (A2)
4	Stem nut	Brass (CW614N)
5	Tie rod	≤ DN 250: Stainless steel (EN 1.4301)
5a	Washer	Stainless steel (A2)
5b	Nut	Stainless steel (A2)
6	Gate	See equipment B
7	Beam	≤ DN 250: Aluminium (EN AW-6063-T6) ≥ DN 300: Coated steel (EN 1.0038)
8	Gland	Coated nodular iron (EN-JS1050 (GGG50))
8a	Stud bolt	Stainless steel (A2), zinc coated
8b	Washer	Stainless steel (A2), zinc coated
8c	Nut	Stainless steel (A2), zinc coated
9 <sup>3)</sup>	Box packing	See equipment D

Pos.	Part	Material (Name)
9a <sup>3)</sup>	Box bottom scraper	See equipment D
9b <sup>3)</sup>	Scraper with o-ring	See equipment D
10/a/b	Valve body	See equipment A
10d	Screw	Steel, zinc coated
10e	Washer	Steel, zinc coated
10f	Nut	Steel, zinc coated
11	Body gasket	PTFE
13 <sup>3)</sup>	Seat	See equipment C
16	Gate guard, not for HW	Stainless steel (EN 1.4301)
17	Gate clevis	Stainless steel (EN 1.4305) ≥ DN 350: Coated carbon steel (EN 1.0045)
18	Cylinder	See data sheet
20	Clevis pin	Stainless steel (EN 1.4305)
21	Split pin	Stainless steel (EN 1.4436)
55	Plug	Steel, zinc coated
